

I'm Sylvain (:seel-vahn), a hands-on technology leader with 15+ years of experience in web engineering and tech leadership roles in France and Australia. My savoir-faire is at the overlap of technology, strategic thinking and creativity. I excel in leading multidisciplinary teams to tackle challenging real-world problems and thrive in environments where I can mentor others while staying actively involved in both the strategic and hands-on aspects of technology development.

medium size clients

#### **Dynamic View**

Lyon, France (on-site)

2011 - 2014

#### Head of Engineering

#### Dynamic View is a Digital Production and Marketing Agency.

Was in charge of engineering in the agency • Led a small team of developers and designers • Architected, scoped, built and managed multiple websites and cross-platform apps for small to medium size clients • Researched and developed new technical solutions for digital signage

#### **Freelancer**

Lvon. France (remote)

2009 - 2014

# Developer & DesignOps

## Worked as a Solopreneur / Freelancer for 5 years.

Founded a multi-disciplinary Freelance Collective working together on client briefs • Architected, scoped, built and managed multiple websites and web apps for small businesses and web agencies

# **Expertise**

# **Strategic Thinking**

Early-stage startup experience as
Founder and CTO. Owned the full
delivery lifecycle on global projects.
Demonstrated strong leadership by
making key strategic decisions driving
successful outcomes.

## **Problem-Solving**

Real passion for solving problems in creative ways, removing bottlenecks and simplifying complex solutions.

Worked on a variety of tough and creatively taxing digital projects.

# **Web Engineering**

Architected, built, and deployed web apps and cross-channel digital experiences at scale. Delivered impactful technical projects with Airbnb, MARS Global, VIC Government and many other clients.

## **Leadership and Mentorship**

Led and mentored engineering teams, fostering a supportive and approachable environment. Built a team from 4 to 15 engineers and achieved finalist at the Under-30 Achiever of the Year.

# **Key Projects**

# Travis

## CTO at Travis

**Travis is a collaborative travel planning platform.** Travellers across the world can find places people love, organise flexibly, collaborate and chat in real time. Travis also enables travel creators to earn from travel recommendations by monetizing their content with bookable hotels. The platform counted more than 8,000 travellers and creators.

#### **MARS**

## Tech. Director for Snickers Hungerithm

The Hungerithm is like a stock exchange for Snickers chocolate bars. Prices of the bars fluctuate in real-time, based on the online mood of the internet. I've been in charge of the global rollout across Australia, America, Russia, Europe and South-East Asia. The project faced huge market success and won multiple awards including a Gold Cannes Lion and a Webby Award.

#### **Airbnb**

Tech. Lead for Until We All Belong

In 2017, Australia was the last Western country in the world not to recognise same-sex marriage. I helped bring Airbnb's "Belong anywhere" statement to life through an interactive online experience that earned multiple awards including a Webby Awards, Developer Awwwards, and CSS Design Awards.

## **Amazon Alexa**

Winner of Global Amazon Alexa Cup

One in four people experiences anxiety at least once in their lives. Inner voice is a voice experience built for Amazon Alexa that helps manage and prevent anxiety. Representing tech among a cross-discipline team, I was invited by Amazon to strategize, prototype and pitch at the Voice19 Summit. Won the Inaugural Global Amazon Alexa Cup after competing against 73 other teams, across 12 different countries.

#### **TAC Australia**

Tech. Lead for Meet Graham

Part interactive sculpture, part educational tool, Graham shows us how our bodies would need to change to survive a car crash. Within 24 hours of being introduced to the world, Graham sparked a global road safety conversation as he was discussed, debated and even memed. The project ranked as the most creative project in the world, and won the Cannes Lion Grand Prix, as well as many web-specific awards.

# Tech. Stack

# **Contributions**

#### **Speaker at Prisma Day**

Streamed a talk on Real-time GraphQL APIs using Prisma and AWS AppSync.

# State of VueJS

Contributed twice to the State of VueJS, a report crafted for technology businesses interested in making educated decisions about their stack.

#### Melbourne VueJS Meetup

Organiser and main speaker at the Melbourne VueJS Meetup until 2021 (380+ members).

## **Open-Source**

Creator of Prisma-AppSync, an OSS library that plugs into Prisma ORM and instantly generates a secure GraphQL API for AWS AppSync (220+ stars).

# **Academic Qualifications**

**3D/CGI Animation** Bellecour Schools of Art (France)

2008 - 2011 Bachelor degree

Computer Science Clermont Institute of Technology (France)

2006 - 2008 HND/Associate degree

# Recommendations

#### Nicole TJ

#### Co-Founder and CEO at Travis

"Sylvain's 200% reliable, always up for an engineering challenge, and delivers under pressure. He's detail-oriented and holds himself to high standards, which shows in the quality of his work. He communicates well and provides great guidance to other developers and designers across the team. It's a joy working with Sylvain!"

#### **Christian Russell**

# Head of Delivery - Digital, Health Services at Bupa

"I had the good fortune of collaborating with Sylvain on some of Clemenger BBDO's toughest, most creatively taxing digital projects. He brought a joyous sense of possibility to every project, and was always looking for ways to improve the outcome and push boundaries, while still keeping the audience and the user experience at the heart of what was delivered. A hands-on leader with an exacting standard, Sylvain excelled in developing junior talent and helping them get to the next level. For him, the success of the tech team was as important as his own personal achievements. Sylvain is incredibly generous and giving of his time and knowledge - during my time at Clems, he made a significant difference to the visibility and credibility of tech in the business."

#### Jai Kora

#### Chief Technology Officer at Syncio

"It's rare that you come across such explorative nature in a person, Sylvain is one of them. I had the pleasure of working with him on many adventurous projects. His ability to find different solutions to a problem always takes me by surprise. As a colleague he is very supportive and fun to share time with, Sylvain is a great asset to the team."
